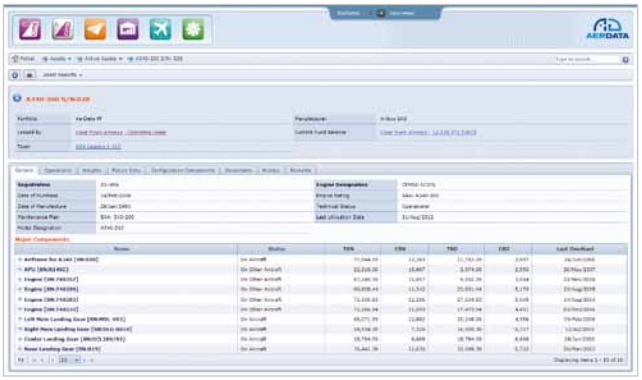
CMS

Lease and Asset Management Software

CMS (Corporate Management System) empowers you with a hosted software tool to optimize all your aircraft lease and asset management business processes.

CMS supports all business processes in aircraft and engine leasing. It's available for airlines, lessors, financial institutions and asset management firms. CMS is offered as a web enabled solution and is accessible via a secure and encrypted internet connection from anywhere in the world. AerData guarantees 24/7 availability of its information systems.



Organizations that use AerData's CMS Software:

- Have better financial control of leased aircraft assets
- Reduce exposure through better insight
- Lower their cost through use of an industry developed tool

The following areas are supported in-depth within AerData's CMS Software:

- Asset Management
- Contract Management
- Maintenance Reserves
- Finance
- Document Management
- Event Management
- Data warehouse analysis and reporting tools
- Cash flow predictions

Customers include:

AVOLON · DVB · BOC AVIATION · Rolls-Royce · TAM AIRLINES

Lease Administration Services

In addition to the software, AerData can provide back office services to CMS customers. Lease Administration Services consists of all aspects of population and maintenance of data on assets, purchases and lease agreements.

The Lease Administration Services can provide additional capacity in the initial data loading during the implementation phase and can be contracted as a long term outsourcing of partial or full data entry and data maintenance on CMS.
